

# How to restore or switch tablet preference settings for Drawing Express

(Wacom Intuos 3/4/5(M) only)

*If you have installed a fresh driver on your PC:*

- ❖ Once you have installed the correct driver & have set up Drawing Express, go to the downloads page on our website, (<http://www.trial-systems.co.uk/support/downloads/>). Under the **Tablet Driver Preference Files** section download the correct preference file for the tablet you are using & the driver you are using it with.
- ❖ Open the downloaded ZIP file & double-click the file inside. You will be asked if you wish to replace your current preferences- click **Replace**. Wait until you see **Restore Successful** & click **OK**. The settings to disable the function keys & touch strips/ring on your tablet will be set up correctly.

---

*If you are switching between two tablets using the same driver:*

When switching between a small & XL tablet, (or vice versa) you can restore the tablet preferences quickly. This means you do not need to set up the Wacom tablet properties for the tablet you are swapping to every time you switch.

- ❖ Follow the procedure to switch the tablets over without re-installing drivers & make sure Drawing Express is closed.
- ❖ Go to the downloads page on our website, (<http://www.trial-systems.co.uk/support/downloads/>). Under the **Tablet Driver Preference Files** section download the correct preference file for the tablet you are using & the driver you are using it with.
- ❖ Open the downloaded ZIP file & double-click the file inside. You will be asked if you wish to replace your current preferences- click **Replace**. Wait until you see **Restore Successful** & click **OK**. The settings to disable the function keys & touch strips/ring on your tablet will be set up correctly.

---

*If you are using a Wacom Intuos 3 or 4 XL tablet you may wish to set-up the tracking in Windows to work the same as in Drawing Express, (tracking is set to portion to work with the tracking area on the tablet). If you want to set this up call the support line number in the centre of your tablet.*
